***Specification***

1. The disclosure is objected to because of the following informalities: Parts of the specification are narrative or directive in form (see the bottom of page 1 "Place a fixing axis..." and "Place a U-shaped spring..." This reads as an instruction manual instead of a patent application.

Portions of the specification are not in proper idiomatic English, or proper grammar.

Further, the passage in lines 9-11 of page 4 do not pertain to the invention. This passage concerning the laws and asking for review of the application must be deleted.

The abstract of the disclosure is objected for the similar reasons as those set forth in the objection to the specification.

Correction is required. See MPEP § 608.01(b).

2. A substitute specification in proper idiomatic English and in compliance with 37 CFR 1.52(a) and (b) is required. The substitute specification filed must be accompanied by a statement that it contains no new matter.

The substitute specification must not contain new matter. The substitute specification must be submitted with markings showing all the changes relative to the immediate prior version of the specification of record. The text of any added subject matter must be shown by underlining the added text. The text of any deleted matter must be shown by strike-through except that double brackets placed before and after

Art Unit: 3617

the deleted characters may be used to show deletion of five or fewer consecutive characters. The text of any deleted subject matter must be shown by being placed within double brackets if strike-through cannot be easily perceived. An accompanying clean version (without markings) and a statement that the substitute specification contains no new matter must also be supplied. Numbering the paragraphs of the specification of record is not considered a change that must be shown.

Appropriate correction is required.

#### ***Allowable Subject Matter***

3. Claim 1 is allowable over the prior art of record.

#### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references show wheel hub assemblies which are steerable.
5. This application is in condition for allowance except for the formal matters noted in paragraphs 1 and 2 above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
